Research Interests

I am interested in Machine Learning, especially focused on Conformal Prediction, predicting with certainty and how to implement Machine Learning models efficiently.

Education

2019 - 2020	MSc High Performance Computing with Data Science, University of Edinburgh.
	Thesis: Deep Learning on SpiNNaker
	Modules include: Probabilistic Modeling and Reasoning, Advanced Message Passing Programming, Data Analytics with High Performance Computing and Extreme Computing
2016 - 2019	BSc Computer Science, Technical University of Cologne
	Thesis: Approximating the Optimal Threshold for an Abstaining Classifier based on a Reward Function with Regression
	Modules include: Algorithms, Artificial Intelligence, Discrete Mathematics/Cryptography, Distributed Systems, Software Engineering and Theoretical Computer Science

Professional Experience

2018 - 2019	Data Scientist and Programmer, RLE International. Mostly Image, Text Recognition and Data Sanitation tasks. We also worked within the domain of Computer Graphics (mesh-based CAD formats and parsing tools).
2015 - 2016	Small Business System Administrator, Lieb EDV Beratung. Main focus were Backup Systems and Windows Server administration for several small businesses.

Technologies

Programming languages	Julia, Python, Rust, Fortran, C, JavaScript, Go, Bash
Machine Learning libraries and frameworks	scikit-learn, Keras, Tensorflow, OpenAI Gym
Distributed and parallel programming	MPI, OpenMP, POSIX Threads, RabbitMQ, Apache Kafka, tokio-rs
Visualization and graphics	HTML, CSS, tikz, Matplotlib, Unity3D, WebGL2, OpenGL 3.0
Others	LaTeX, Git, Numpy, Node.js, OpenSUSE (Linux), SQL, PL/SQL, UML

Languages

German (native)

English (C1)
